Hi Don,

I am familiar with this area and have participated in past discussions regarding this connection. Each discussion concluded with the following challenges unmet:

- Gaining full neighborhood support
- Lack of private funding (the City of Poway has no public funding dedicated to this concept)
- Definition of emergency and how the gate would be used
- On-going maintenance, repair, service costs

While we support improved emergency preparedness, we also recognize the impacts on neighborhoods and the need to balance residents' concerns. I did share your interest with our Director of Development Services, Bob Manis, and other staff members from our Development Review Committee. Collectively, we agreed that resurrection of this idea would best begin with the Development Services Department and the City Planner David De Vries. He can be reached at (858)668-4604 or at Ddevries@poway.org.

I hope this is helpful. Stay warm and dry!

Jon M. Canavan
Deputy Fire Chief
